## The ETMC Neurological Institute:

### Advancing care from head to toe.

A neurological problem can make it difficult for you to sleep—or stay awake; to move—or stop moving; to speak understandably—or to understand speech. Pain, numbness, dizziness, learning disabilities, tremor, seizures—the symptoms of neurological diseases and disorders are many and varied, and they can occur anywhere from your head down to your toes.

That's why the ETMC Neurological Institute offers specialists in occupational medicine, pain management, sleep medicine, and even ear, nose and throat medicine, as well as in neurology, pediatric neurology, neuropsychology, neuroradiology, and neurosurgery. Working as one, these remarkable physicians provide leading-edge treatment that enhances the lives of patients throughout East Texas:

**CyberKnife® radiosurgery**—treats tumors virtually anywhere in the body, on an outpatient basis, with no anesthesia, no incision, no pain, no hospital stay or extended recovery period. ETMC offers the only CyberKnife in East Texas, bringing new hope to patients whose tumors have previously been considered inoperable.

**Deep brain stimulation**—treats benign essential tremor and Parkinsonism, dramatically improving the quality of life of patients who suffer from the debilitating effects of these conditions. ETMC offers the region's only Movement Disorders Center, headed by MIT- and Harvard-trained neurologist Dr. George Plotkin and offering a wide range of surgical and nonsurgical treatments.

**Advanced spine surgery**—from the newest minimally invasive techniques to the most complex fusion procedures, our neurosurgeons bring state-of-the-art technology to the treatment of spinal disorders.

To learn more about advanced treatment for conditions of the brain, spine and nervous system, visit [www.etmc.org/neuro](http://www.etmc.org/neuro) or call 1-800-728-2702.

**Advancing care. Enhancing life.**
